Open Data?

"Open data is data that can be freely used, reused and redistributed by anyone - subject only, at most, to the requirement to attribute and sharealike." -opendatahandbook.org

Awesome!

Problem!

Stars of the Open Data Walhalla

Star 1: Make your data available on the web (in whatever format)

Star 2: Make it available as structured data (e.g. excel table instead of image)

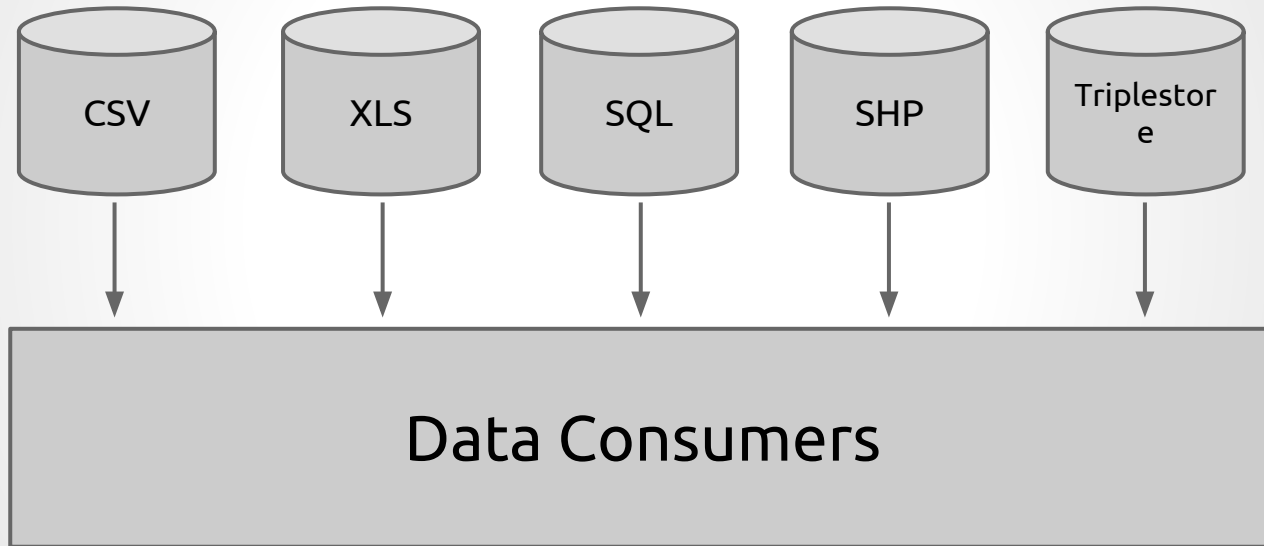

Star 3: Use non-proprietary formats (e.g. CSV instead of Excel)

Star 4: Use URLs to identify things, so that people can point to your stuff

Star 5: Link data to other people's data to provide context

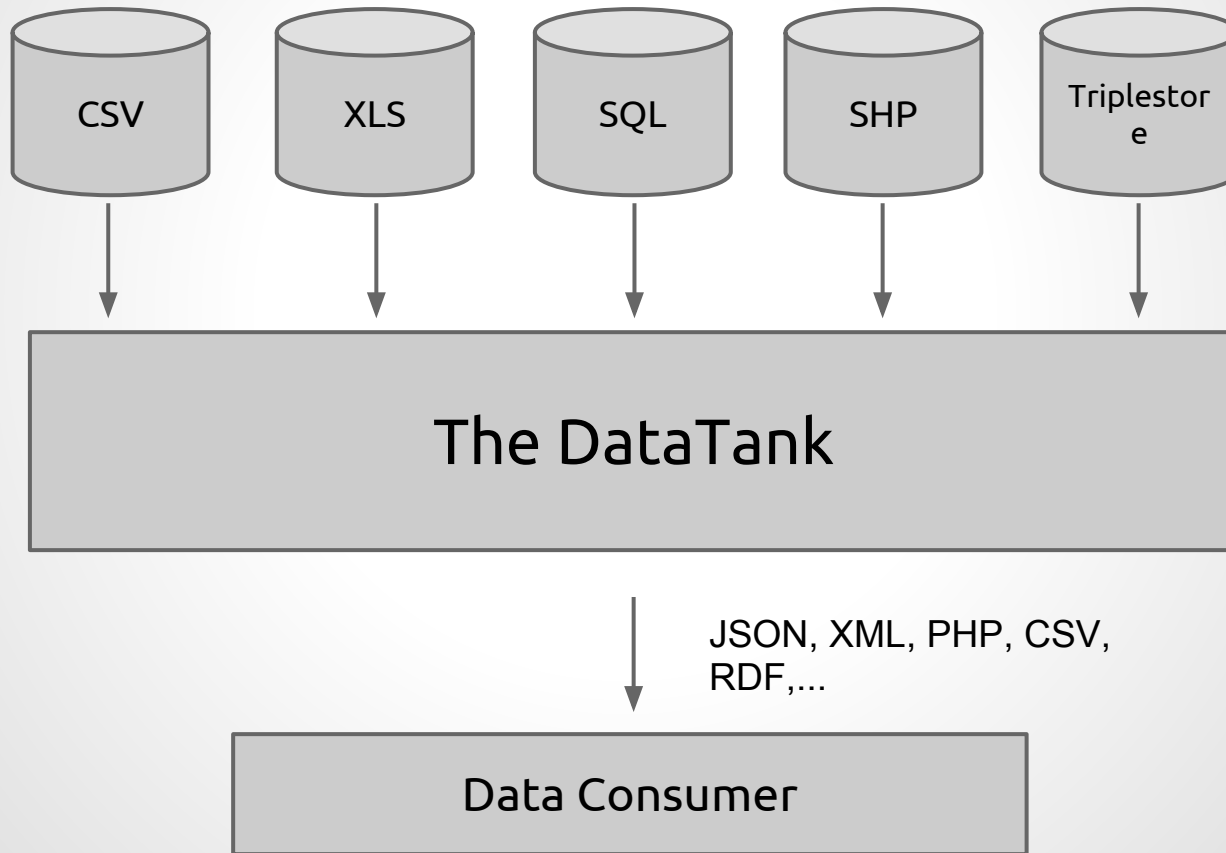

We Open Data to the rescue!

A world without the datatank.

Maximum step towards open data Walhalla: 3

A world with the datatank.

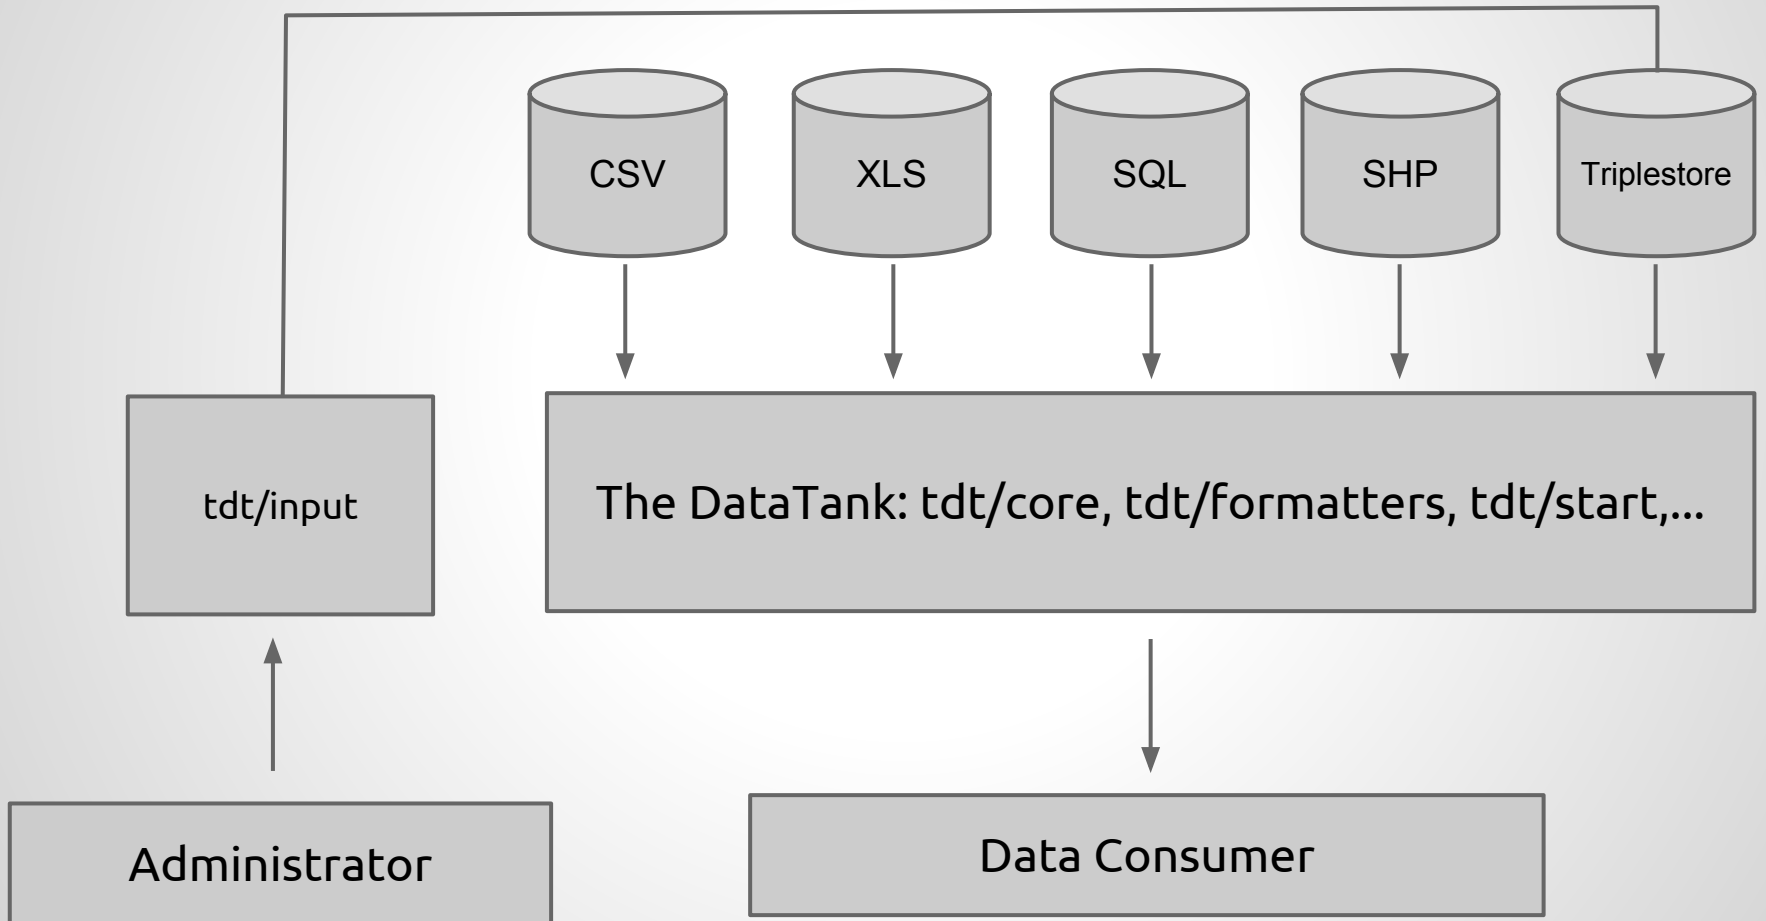

All steps of Open Data Wallhalla.

Lean and Mean

**Great! ... But what about semantics?
The last star of Open Data Walhalla.**

tdt/input

All steps of Open Data Wallhalla.

It's taking off, join the ride!
